Java Programming Project Presentation

- Project Title: Clinic Prescription Record and Patient Visit Tracking System
- Course: Java Programming
- Student Name & Roll No: Merlin M (25bcs233)
- Department: Computer Science
- Mentor / Guide: Mr.Dharaneesh

Java Programming
Project Presentation

Introduction:

- Clinics handle many patients every day.
- Managing prescriptions and patient visits manually can be difficult.
- This system is developed using Java programming to store and manage patient records.
- It helps doctors easily track patient visits and prescriptions.
- The system reduces paperwork and improves efficiency.

Java Programming
Project Presentation

Objectives:

- To develop a Clinic Management System using Java.
- To maintain patient details and prescription records.
- To track patient visit history.
- To apply Object Oriented Programming (OOP) concepts.
- To simplify clinic data management.

Java Programming
Project Presentation

Problem Statement:

- Manual record keeping is time-consuming.
- Patient records can get lost or damaged.
- Difficult to track previous prescriptions.
- Hard to manage multiple patient visits.

Solution:

- A digital system that stores patient and prescription details efficiently.

Java Programming
Project Presentation

System Requirements:

Hardware Requirements:

- Processor: Intel i3 or higher
- RAM: 4 GB minimum
- Storage: 500 MB free space

Software Requirements:

- Operating System: Windows / Linux
- Programming Language: Java
- IDE: NetBeans / Eclipse / IntelliJ

Java Programming
Project Presentation

System Design:

The system contains the following modules:

- Patient Registration Module
- Prescription Record Module
- Patient Visit Tracking Module
- Search Patient Module
- Data Storage Module

These modules help manage clinic records efficiently.

Java Programming
Project Presentation

Module Description:

1. Patient Module:
Stores patient details such as name, age, and contact.

2. Prescription Module:
Stores doctor prescriptions and medicines.

3. Visit Tracking Module:
Tracks patient visit date and history.

4. Search Module:
Finds patient details quickly.

Java Programming
Project Presentation

Algorithm:

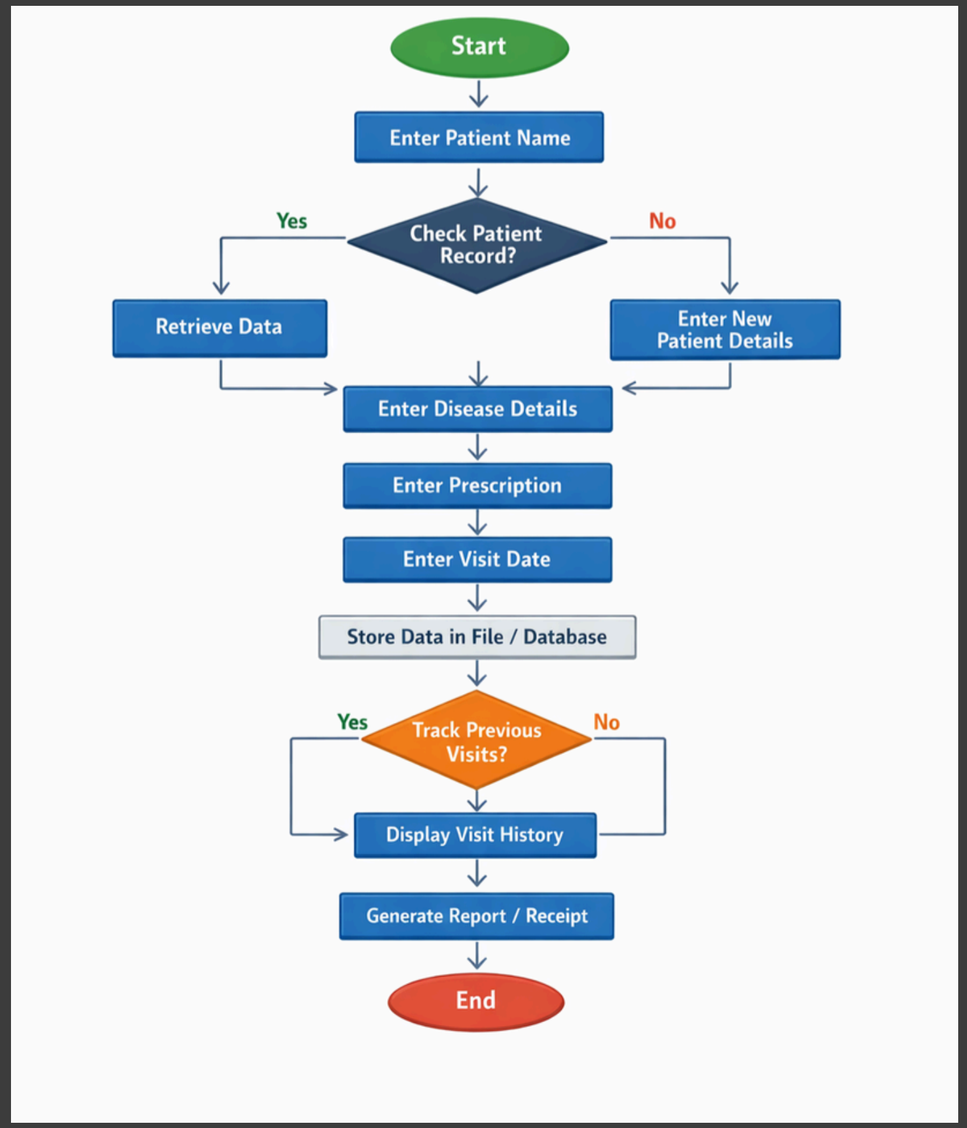

1. Start
2. Display menu options
3. Enter patient details
4. Save prescription information
5. Store visit date and record
6. Search patient details if needed
7. Display patient history
8. Stop

Java Programming
Project Presentation

Implementation:

Concepts used in the project:

- Classes and Objects
- ArrayList for storing records
- Loops and Conditional Statements
- Java Input methods (Scanner)
- Basic File Handling

Java Programming
Project Presentation

Source Code:

```
import java.util.*;
import java.io.*;

public class Main {

  static class Patient {
    String name, disease, date;

    Patient(String n, String d, String dt) {
      name = n;
      disease = d;
      date = dt;
    }
  }

  public static void main(String[] args) throws Exception {

    Scanner sc = new Scanner(System.in);
    ArrayList<Patient> list = new ArrayList<>();

    int choice;

    do {
      System.out.println("\n1.Add Record  2.Search by Name  3.Save  4.Exit");
```

```
    choice = sc.nextInt();
    sc.nextLine();

    // Add details
    if (choice == 1) {
      System.out.print("Enter Name: ");
      String name = sc.nextLine();

      System.out.print("Enter Disease: ");
      String disease = sc.nextLine();

      System.out.print("Enter Date: ");
      String date = sc.nextLine();

      list.add(new Patient(name, disease, date));
      System.out.println("Record Saved!");
    }

    // Search by name
    else if (choice == 2) {
      System.out.print("Enter Name: ");
      String name = sc.nextLine();

      boolean found = false;

      for (Patient p : list) {
        if (p.name.equalsIgnoreCase(name)) {
          System.out.println("\n--- Patient Details ---");
          System.out.println("Name: " + p.name);
```

Java Programming
Project Presentation

Results:

Patient records stored successfully.

1. Easy tracking of prescriptions.
2. Fast search of patient details.
3. Reduced manual work.

Java Programming
Project Presentation

Conclusion:

- The system successfully manages clinic prescription records.
- Helps doctors track patient visit history easily.
- Demonstrates Java programming and OOP concepts.

Java Programming
Project Presentation

Future Enhancements:

- Add Graphical User Interface (GUI) using Java Swing.
- Connect to MySQL database.
- Add login and security system.
- Enable online cloud storage.
